Experience

WordPress Developer — Freelance

May 2019 – Present

- Extensive experience in WordPress development, specializing in creating highly functional and visually appealing websites.
- Proven track record of successfully executing numerous projects for clients across various industries.
- Proficient in creating custom WordPress themes from scratch or modifying existing themes to meet specific design requirements.
- Understanding of responsive web design principles, ensuring WordPress websites are optimized for various devices and screen sizes..

Projects

Expense Tracker | *Programming Fundamentals - java, python*

- Developed a Java application for tracking expenses, allowing users to record, categorize, and manage their expenses efficiently.
- Implemented a user-friendly console interface that enables users to add new expenses, categorize them, and view expense reports with ease.

Quiz Application | *OOP - java, python*

- Designed and developed a Java application using object-oriented programming principles to create a quiz platform.
- Implemented a user-friendly interface that allows users to take quizzes, view scores, and receive feedback, enhancing their learning experience.

Address Book | *Data Structure - java, python*

- Developed an address book application that allows users to store and manage their contacts' information.
- Implemented functionalities for adding new contacts, updating existing contacts, deleting contacts, and searching for contacts using linked list data structure.

MedMeetUp | *Technology Management - python, django, html, css, bootstrap, css, js, sqlite*

- Conceptualized and developed MedMeetUp, a cutting-edge doctor appointment system, using Django, Bootstrap, and JavaScript.
- Engineered an intuitive admin panel for efficient management of appointments, doctor profiles, and secure patient interactions, enabling patients to book appointments with doctors and access digital prescriptions and medical records.

WooCommerce Website | *Technology Management - python, django, html, css, bootstrap, css, js, sqlite*

- Downloaded and resolved all kinds of dependencies for an open-source WooCommerce website.
- Successfully configured the website to run smoothly on a local machine using Django, Bootstrap, and JavaScript.
